

How to Make the Perfect Luminary Candle

Luminary candles are the perfect way to add a special touch for parties, weddings, and neighborhood events. A luminary is simple and easy to make. Just follow the four simple steps below.

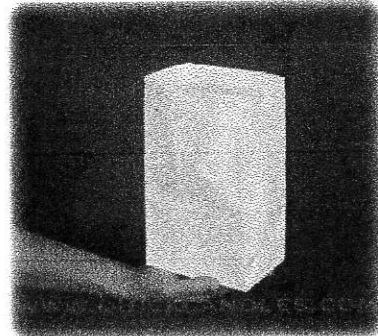

Always place luminary bags that contain a burning candle on a fire proof surface (such as a sidewalk or street). Do not place them on or near things that can catch fire.

WARNING:
To Prevent Fire

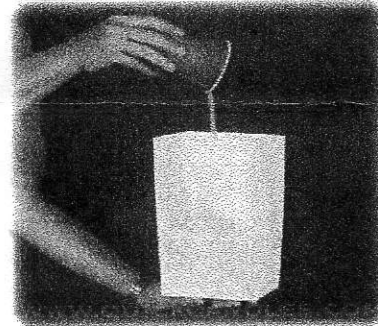

Step 1:

Remove bag from package and open it. Make sure that all the extra folds and wrinkles are flattened and straight. Fold the top of the bag down 1-2" from the top. This will add strength to the top of the bag

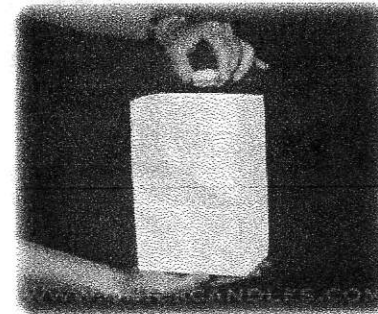

Step 2:

Pour (1) cup of sand into the folded bag. Be sure to use at least 1-2 pounds of sand per bag as this will ensure the bag won't be blown away by a gust of wind or passing car. Make sure the sand is level inside the bag.

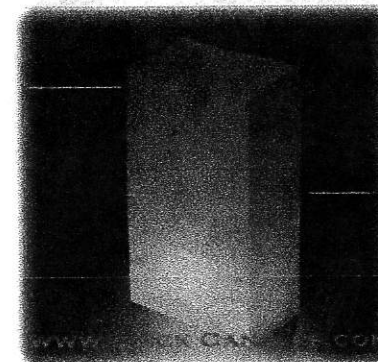

Step 3:

Insert candle into center of the sand. Make sure candle is level and the flame is away from the bag.

Step 4:

Enjoy your beautiful Luminary.
